## Difficult-to-Treat Psoriasis Cases Webinar

Although numerous evidence-based studies demonstrate the efficacy of biologics for overall skin clearance in moderate-to-severe plaque psoriasis, psoriasis in difficult-to-treat areas and multiple comorbidities are needed to better inform decision-making in clinical practice. Moreover, biologic failure caused by drug ineffectiveness is a common occurrence in patients who do not respond, lose response, or are intolerant to treatment.

This webinar will highlight the current treatment strategies for how to choose the right biologic therapy in difficult-to-treat psoriasis, as well as to provide an update on real-world evidence for biologics in difficult-to-treat psoriasis through case presentations.

## Meet our Expert Panel

Speaker

**Asst Prof Andreas Pinter**

Department of Dermatology,  
Venereology, and Allergology  
University Hospital Frankfurt am Main  
Germany
